TO : Chief, Operations School  
 THRU : Assistant for Headquarters Training

FROM : Chief Instructor, Counterespionage Operations

SUBJECT: Final Course Report  
 Counterespionage Operations No. 6

DATE: 14 November 1956

1. Counterespionage Operations Course No. 6 met during the period 15 October - 2 November 1956. The fifteen students can be classified as follows:

a. By Grade

GS-14 - 1  
 GS-13 - 2  
 GS-12 - 3  
 GS-11 - 5  
 GS-9 - 2  
 GS-7 - 1  
 One Major, U. S. Army

b. By career designation

FI - 6  
 PP - 7  
 Security - 2

c. By Area Division

FE - 9  
 EE - 2  
 SR - 1  
 NEA - 2  
 Security Office - 1

2. Most of the students were very limited in operational and/or CE experience and some had no such experience at all. The instances of misunderstanding or misinterpretation of instructors' and guest lecturers' remarks appeared to be far greater than usual. Every effort was made to clear up misunderstandings which were detected but the general reticence of the group to participate in class discussion left us with a rather uneasy feeling about the possible extent of their misunderstanding. Even in the case of the double agent seminar when they were notified a week in advance that questions would be welcomed, only two students submitted questions and few additional ones were put to the panel during the actual seminar. In his critique one student commented on the seminar as follows: "Could have been better...with better students in the class...."

3. Student presentations--usually one of the highlights of the course--were generally poor and the personal reaction of the students was unenthusiastic. Some of the students suggested that the instructors select only a few cases to be presented before the class.

4. Our greatest concern was with the apparent lack of seriousness and maturity on the part of the students. The scheduled reading periods were not used to the best advantage, and the students themselves were not a compatible group.

5. Comments by the students on the practical value of the course are set out below:
